

What is claimed is:

1. A paint conduit comprising:
a conduit wall enclosing an interior;
a cleaning device comprising a hose arranged in the interior and a pressurized fluid source connectable to the hose.
2. The paint conduit according to claim 1, wherein the hose is expandable at least in a radial direction of the hose.
3. The paint conduit according to claim 1, further comprising a controllable return outlet.
4. The paint conduit according to claim 1, wherein the pressurized fluid source is controllable.
5. The paint conduit according to claim 1, wherein the hose is closed at the end that is facing away from the pressurized fluid source.
6. The paint conduit according to claim 1, wherein the hose is provided with a closable exit from the interior.

7. The paint conduit according to claim 1, wherein the hose is secured relative to the paint conduit at least in the area of the end of the interior facing away from the pressurized fluid source.
